2. Vrouw johanna near 600 tons each masts/cordage/ptich/tar/turps going
ostend-cadiz. met them escorted by 50 gun ships she chased us and showed
English colours we thought she english. when she summoned us to strike they
fired a broadside, we returned it and had a running fight for nearly two hours,
in a hard squal her mainmast carried away having been wounded by our shot. As
soon as we perceived their distress we tacked and brought to about two points
on their weatherbow when by our small arms we prevented their clearing the
wreck and raked her for near an hour, when they bore around and stood before
the wind giving us every now and then a gun from their stern well directed
which did us much damage. The evening coming on and seeing it was not likely
to take the Frigate, I hauled my wind and stood for the two ships to see what
they were. Next daylight found them to be of no force and took them.

I had nine of mybrsve men killed and 17 wounded including mr jas anderson
1st lt and the bosun.
